A portion of the net proceeds was used to repay the remaining outstanding balance of the Hayfin Facility, which bore interest at LIBOR + 7.00%, and the outstanding balance of the Hellenic Facility, which bore interest at LIBOR + 3.90%, resulting in five unencumbered ships. - In January 2022, agreed an amendment to the existing \$268.0 million Syndicated Senior Secured Credit Facility with an outstanding balance of \$213.2 million, to extend the maturity date from September 2024 to December 2026, favorably amend certain covenants, and release three vessels from the facility's collateral basket, at an unchanged rate of LIBOR + 3.00%. George Youroukos, Executive Chairman of Global Ship Lease stated: "These are uncertain times, with the world facing macro headwinds, geopolitical tensions, rising interest rates, and inflation. Against this backdrop, we have continued to focus on making Global Ship Lease as resilient as possible, by building our forward contract cover, fortifying our balance sheet, and positioning ourselves to weather the challenges and take advantage of the opportunities that arise in a cyclical industry such as ours. During the quarter, our high-quality ships, and strong relationships with our customers, allowed us to forward fix 10 ships, on firm charters of five years each, off positions in late-2022, 2023, and even 2024. These new charters add over \$770 million of contracted revenues, and bring our total forward cover to more than \$2.2 billion, spread over almost three years, providing further support for our sustainable annualized dividend of \$1.50 per common share. Our focus on long-term charters, and deep customer relationships, will also underpin collective efforts to decarbonize shipping, in step with an evolving regulatory and commercial environment that will hinge on ever closer cooperation between owners and charterers."

lan Webber, Chief Executive Officer, commented: "Our conservative, risk-averse business model, and disciplined approach to capital allocation, have continued to inform our focus upon building and protecting shareholder value through the cycle. Even as central banks have raised interest base rates to the highest levels seen in over a decade, we have successfully reduced our overall cost of debt to 4.53%, which is only slightly higher than the Federal Reserve's benchmark interest rate, and have fully hedged our exposure to floating interest rates. Furthermore, we have no re-financing requirements before 2026. During the course of this year, we have added over \$920 million of contracted revenues, supporting our sustainable dividend and allowing us to repurchase an additional \$15 million of common shares since our previous earnings release, bringing total share repurchases since we established our \$40 million buy-back authorization in second quarter to \$20 million."

## Revenue and Utilization

Revenue from fixed-rate, mainly long-term, time-charters was \$172.5 million in the three months ended September 30, 2022, up \$33.9 million (or 24.5%) on revenue of \$138.6 million for the prior year period. The period-on-period increase in revenue was principally due to (i) a 12.1% increase in ownership days, due to the net acquisition of 22 vessels in 2021, 17 of which were delivered after June 30, 2021, resulting in 5,980 ownership days in the third quarter of 2022, compared to 5,334 in the third quarter of 2021, (ii) increased revenue on charter renewals at higher rates on nine vessels, (iii) a decrease in unplanned off hire days from 137 in the third quarter of 2021 to 102 in the same quarter of 2022 partially offset by \$15.3 million reduction in the credit from amortization of intangible liabilities arising on below-market charters attached to certain vessel additions and \$3.5 million reduction in the credit from straightlining the effect of time charter modifications. The 102 days of unplanned offhire in the third quarter of 2022 include mainly an incident of 49 days for diesel generators repairs in one ship and the remaining days relate to operational and technical incidents. The 47 days of planned offhire for drydockings in the third quarter of 2022 were attributable to two regulatory drydockings completed, while in the comparative period of 2021, the 190 days of planned offhire were mainly attributable to five regulatory drydockings. Idle time was nil in the third quarter of 2022, compared to 13 days in the comparative period of the prior year.

For the nine months ended September 30, 2022, revenue was \$480.6 million, up \$186.2 million (or 63.2%) on revenue of \$294.4 million in the comparative period, mainly due to the factors noted above.

The table below shows fleet utilization for the three and nine months ended September 30, 2022 and 2021, and for the years ended December 31, 2021, 2020, 2019 and 2018.

The increase was mainly due to the commissions of the 22 vessels acquired in 2021, 17 of which were delivered after June 30, 2021, increased commissions on charter renewals at higher rates plus additional voyage administration costs and other voyage expenses mainly related to COVID-19 port restrictions and additional operational requests from charterers.

Depreciation for the nine months ended September 30, 2022 was \$60.6 million, compared to \$42.3 million in the comparative period, with the increase being due to the net acquisition of 22 vessels in 2021, 17 of which were delivered after June 30, 2021.

- (1) Modern design, high reefer capacity, fuel-efficient vessel.
- (2) In many instances charterers have the option to extend a charter beyond the nominal latest expiry date by the amount of time that the vessel was off hire during the course of that charter. This additional charter time ("Offhire Extension") is computed at the end of the initially contracted charter period. The Latest Charter Expiry Dates shown in this table have been adjusted to reflect offhire accrued up to the date of issuance of this release plus estimated offhire scheduled to occur during the remaining lifetimes of the respective charters. However, as actual offhire can only be calculated at the end of each charter, in some cases actual Offhire Extensions if invoked by charterers may exceed the Latest Charter Expiry Dates indicated.
- (3) ZIM Norfolk (ex UASC AI Khor) & ZIM Xiamen (ex Maira XL). On November 22, 2021 we announced the forward fixture of these two ships, upon the expiry of their existing charters in the second and third quarters of 2022, respectively, for approximately five years each at a charter rate of \$65,000 per day.
- (4) MSC Qingdao & Agios Dimitrios are fitted with Exhaust Gas Cleaning Systems ("scrubbers").
- (5) GSL Ningbo chartered to MSC at \$22,500 per day to July 2023. Thereafter, the charter has been extended by 48 to 52 months, at a rate expected to generate annualized Adjusted EBITDA of approximately \$16.6 million.
- (6) GSL Eleni (delivered 2Q 2019) is chartered for five years; GSL Kalliopi (delivered 4Q 2019) and GSL Grania (delivered 3Q 2019) are chartered for three years plus two successive periods of one year each, at the option of the charterer. For GSL Kalliopi and GSL Grania the first option periods were exercised in May 2022. During the option periods the charter rates for GSL Kalliopi and GSL Grania are \$18,900 per day and \$17,750 per day respectively, with these new rates to apply from 3Q 2022 for GSL Grania and 4Q 2022 for GSL Kalliopi.
- (7) Mary, Kristina, Katherine, Alexandra, Alexis, Olivia I were forward fixed to Hapag-Lloyd for five years, followed by two periods of 12 months each at the option of the charterer. The new charters are scheduled to commence, on a staggered basis, between late 2023 and late 2024, following the expiration of existing charters. The charters are expected to generate average annualized Adjusted EBITDA of approximately \$13.1 million per ship.
- (8) Contract cover for each ship is for a firm period of at least three years from the date each vessel was delivered, with charterers holding a one-year extension option on each charter (at a rate of \$12,900 per day), followed by a second option (at a rate of \$12,700 per day) with the period determined by and terminating prior to each vessel's 25 th year drydocking & special survey.
- (9) Tasman. 12-month extension at charterer's option was declared in May 2022, at an increased rate of \$20,000 per day. The new rate applied from 3Q 2022.
- (10) Ultra-high reefer ships of 5,470 TEU each. Contract cover on each ship is for a firm period of three years at a rate of \$36,500 per day, with a period of an additional three years (at \$17,250 per day) at charterers' option.
- (11) Orca I. Chartered at \$21,000 per day through to the median expiry of the charter in 2Q2024; thereafter the charterer has the option to charter the vessel for a further 12-14 months at the same rate.
- (12) GSL Susan, CMA CGM Jamaica, CMA CGM Sambhar and CMA CGM America. In July 2022, these four vessels were forward fixed for five years +/- 45 days at charter rates expected to generate annualized Adjusted EBITDA of approximately \$11.3 million per vessel. The new charter for GSL Susan is scheduled to commence in late 2022, while those for the other three ships are due to commence towards the end of 1Q 2023.
- (13) GSL Valerie. Chartered to ZIM at an average rate of \$35,600 per day-\$40,000 for the first 12 months, \$36,000 for the next 12 months and \$32,000 for the remaining period.

#### Reconciliation of Non-U.S. GAAP Financial Measures

To supplement our financial information presented in accordance with U.S. GAAP, we use certain "non-GAAP financial measures" as such term is defined in Regulation G promulgated by the SEC. Generally, a non-GAAP financial measure is a numerical measure of a company's operating performance, financial position or cash flows that excludes or includes amounts that are included in, or excluded from, the most directly comparable measure calculated and presented in accordance with U.S. GAAP. We believe that the presentation of these measures provides investors with greater transparency and supplemental data relating to our financial condition and results of operations, and therefore a more complete understanding of factors affecting our business than U.S. GAAP measures alone. In addition, we believe that the presentation of these matters is useful to investors for period-to-period comparison of results as the items may reflect certain unique and/or non-operating items such as impairment charges, contract termination costs or items outside of our control.

We believe that the presentation of the following financial measures is useful to investors because they are frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry.

#### A. Adjusted EBITDA

Adjusted EBITDA represents net income available to common shareholders before interest income and expense, earnings allocated to preferred shares, income taxes, depreciation and amortization of drydocking net costs, gains or losses on the sale of vessels, amortization of intangible liabilities, charges for share based compensation, fair value adjustment on derivatives, the effect of the straight lining of time charter modifications, and impairment losses. Adjusted EBITDA is a non-U.S. GAAP quantitative measure used to assist in the assessment of our ability to generate cash from our operations. We believe that the presentation of Adjusted EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. Adjusted EBITDA is not defined in U.S. GAAP and should not be considered to be an alternative to net income or any other financial metric required by such accounting principles. Our use of Adjusted EBITDA may vary from the use of similarly titled measures by others in our industry.

Adjusted EBITDA is presented herein both on a historic basis and on a forward-looking basis in certain instances. We do not provide a reconciliation of such forward looking non-U.S. GAAP financial measure to the most directly comparable U.S. GAAP measure because such U.S. GAAP financial measure on a forward-looking basis is not available to us without unreasonable effort.

### B. Normalized net income

Normalized net income represents net income available to common shareholders after adjusting for certain non-recurring items. Normalized net income is a non-U.S. GAAP quantitative measure which we believe will assist investors and analysts who often adjust reported net income for items that do not affect operating performance or operating cash generated. Normalized net income is not defined in U.S. GAAP and should not be considered to be an alternate to net income or any other financial metric required by such accounting principles. Our use of Normalized net income may vary from the use of similarly titled measures by others in our industry.

Normalized Earnings per Share represents Earnings per Share after adjusting for certain non-recurring items. Normalized Earnings per Share is a non-U.S. GAAP quantitative measure which we believe will assist investors and analysts who often adjust reported Earnings per Share for items that do not affect operating performance or operating cash generated. Normalized Earnings per Share is not defined in U.S. GAAP and should not be considered to be an alternate to Earnings per Share as reported or any other financial metric required by such accounting principles.
